

Methods of Using the Microscope, Camera-Lucida and Solar Projector: For Purposes of Examination and the Production of Illustrations (Classic Reprint)

Filesize: 2.33 MB

Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from *Methods of Using the Microscope, Camera-Lucida and Solar Projector: For Purposes of Examination and the Production of Illustrations* For many years the writer has had microscopes mounted in this way and hereby testifies strongly in favor of this method of using the microscope. The system is exemplified in the Laboratory of the Division of Pathology and Physiology, and as experience has added improvements to each successive plant erected, it may be worth while to describe this recent outfit. The plan is carried out in cement and steel. See Fig. I. Below the building is a large block of cement weighing several tons. In this block of cement three T-girders, two of which are approximately eight inches in each dimension, arc imbedded vertically to the depth of about four feet. The central girder carries the microscope, together with certain accessory apparatus connected with the illumination of the object. This girder is much smaller and shorter than the other two, extending only about eighteen inches above the floor of the microscope room. The other two girders are mates and extend to within about eighteen inches of the ceiling of the room; in other words, project upward into the room about eleven feet. The building being constructed of wood, the floors were laid about the pillars after they had been set in the cement and the whole structure was then given sufficient time to settle into its permanent position. This usually occurs in the course of a few months. When everything is settled into position, an ordinary key-hole saw is run through the floor entirely around the contours of the girders, so that at the end of the...
