To get **Lick Observatory Bulletins Volume 8** PDF, remember to refer to the button below and save the document or get access to other information which might be in conjunction with LICK OBSERVATORY BULLETINS VOLUME 8 book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1916 Excerpt: . a few stars north of the zenith were measured. 6. Sensitivity Tests on Stars.--The sensitivity of these thermo-couples was tested by means of an artificial star, and also when they were mounted in the telescope and exposed to a star such as Vega. It was found that the radiation sensitivity of the two elements in No. 7 (1, bismuth-bismuth and tin alloy; 2, bismuth-platinum) differed but little in spite of the fact that the thermo-couple containing the bismuth tin alloy had a 50 per cent higher thermo-electric power. The best receiver, Xa, (Bi-BiSn; 0.38 mm. in diameter) was perhaps 10 per cent more sensitive than the others in container No. 7. This receiver, recorded as No. 7-lo in the appended tables, was therefore used for most of the work (until the quartz tube containing the calcium was broken), owing to the fact that container No. 6 appeared to leak slightly at the start, and hence was not used, for fear of a variation in its radiation sensitivity. In container No. 6, three of the receivers (1a, 16, and 3a) had practically the same radiation sensitivity when exposed to Arcturus. The best receiver, 36, was from 30 to 40 per cent more sensitive than the others, and it was perhaps 25 per cent more sensitive than the best receiver (1a) in container No. 7. Similar tests made in the laboratory, using an artificial star, showed that, with the exception of the receiver 36, all the receivers...
