# Generalized Principal Component Analysis: 2015

Filesize: 2.41 MB

Reviews

If you need to adding benefit, a must buy book. it was actually writtern extremely flawlessly and helpful. You can expect to like just how the blogger compose this pdf.
(Rosemarie Kirlin)

GENERALIZED PRINCIPAL COMPONENT ANALYSIS: 2015

To save **Generalized Principal Component Analysis: 2015** PDF, you should click the button below and save the file or have accessibility to additional information which might be have conjunction with GENERALIZED PRINCIPAL COMPONENT ANALYSIS: 2015 ebook.

Springer-Verlag New York Inc. Hardback. Book Condition: new. BRAND NEW, Generalized Principal Component Analysis: 2015, Yi Ma, Shankar Sastry, Rene Vidal, This book provides a comprehensive introduction to the latest advances in the mathematical theory and computational tools for modeling high-dimensional data drawn from one or multiple low-dimensional subspaces (or manifolds) and potentially corrupted by noise, gross errors, or outliers. This challenging task requires the development of new algebraic, geometric, statistical, and computational methods for efficient and robust estimation and segmentation of one or multiple subspaces. The book also presents interesting real-world applications of these new methods in image processing, image and video segmentation, face recognition and clustering, and hybrid system identification etc. This book is intended to serve as a textbook for graduate students and beginning researchers in data science, machine learning, computer vision, image and signal processing, and systems theory. It contains ample illustrations, examples, and exercises and is made largely self-contained with three Appendices which survey basic concepts and principles from statistics, optimization, and algebraic-geometry used in this book. Rene Vidal is a Professor of Biomedical Engineering and Director of the Vision Dynamics and Learning Lab at The Johns Hopkins University. Yi Ma is Executive Dean and Professor at the School of Information Science and Technology at ShanghaiTech University. S. Shankar Sastry is Dean of the College of Engineering, Professor of Electrical Engineering and Computer Science and Professor of Bioengineering at the University of California, Berkeley.
